

## THE FRONTIER ECOLOGY AND CLIMATE CHANGE

Through the efforts of the CLC Ecology Commission, CLC has linked with the Global Catholic Climate Movement (GCCM), a network of Catholic communities, organizations and partners who would like to unite various local and global efforts under a common platform. Common actions that we encourage CLC participation through GCCM are:

- Signing a petition for leaders to keep the temperature rise below 1.5C
- COP21 Paris Climate Summit Prayer (which can be done individually, or by communities)
- Global Climate March (Nov 29)

This is currently our platform for united action. Help us to reach 1 million signatures. We strongly encourage you to link your CLC activities in the Ecology Frontier (whether it be vigils, advocacy letters and other apostolic action) with this in mind, and to register as CLC groups in their website: <http://catholicclimatemovement.global/take-action/>.

By doing this, we connect beyond our world CLC community and move closer to actual global common action.
